Collin County Teen Court – Kyle Therian

Collin County Teen Court is responsible for the administration of the county-wide program involving the handling and disposition of cases referred by the justices of the peace as well as other agencies. Teen Court is also responsible for the recruitment and training of teen volunteers for participation in the program. As an extension of the office, Teen Court also coordinates a variety of events and programs specifically designed for young people - giving them the opportunity to get involved and learn about county government.

What is Rotary

WE ARE PEOPLE OF ACTION

Rotary is a global network of 1.2 million neighbors, friends, leaders, and problem-solvers who come together to make positive, lasting change in communities at home and abroad.

Solving real problems takes real commitment and vision. For more than 110 years, Rotary members have used their passion, energy, and intelligence to take action on sustainable projects. From literacy and peace to water and health, we are always working to better our world, and we stay committed to the end.

Our motto:

Service Above Self

For more than 110 years, our guiding principles have been the foundation of our values: service, fellowship, diversity, integrity, and leadership.

What we do

Rotary members believe that we have a shared responsibility to take action on our world's most persistent issues. Our 35,000+ clubs work together to:

- Promote peace
- Fight disease
- Provide clean water, sanitation, and hygiene
- Save mothers and children
- Support education
- Grow local economies

WE ARE PROBLEM-SOLVERS

A replica iron lung teaches a new generation about polio

Dispatched to Ghana with a fellow British Rotarian to scout club service opportunities, Roger Frank hadn't planned their visit to coincide with National Immunization Days, but the pair – Frank and Dr. Carl Hallam – jumped, unhesitating, into the thick of inoculations. During a four-day stretch in October 2015, nearly 2,000 children in the area were protected from poliomyelitis. The effort galvanized Frank, who brainstormed for a way to do even more at home: How could he promote polio eradication when few of his countrymen gave much thought to the scourge?

Recalling the fear that gripped the UK, the U.S., and elsewhere during the height of the polio epidemic in the early 1950s, Frank, a past president of the [Rotary Club of Upper Eden](#), thought of the iron lung, a device largely relegated to museums and history books. The lifesaving mechanical respirator was a potent, if depressing, symbol of the debilitating disease. An iron lung, Frank reasoned, would educate younger generations who grew up free of the fear created by polio, a virus that is spread easily, during the 20th century.

He hoped to borrow a model to put on tour to serve as a reminder that the polio fight remains unfinished. "I spent the last three months of 2015 looking for an iron lung in hospitals, etc.," says Frank, 65. "I had hoped to source an original unit, but they have all been scrapped and those that remain are in museums, and they would not part with them. Being fully committed to the project, I had no other option than to build an iron lung myself.

"This proved quite a challenge," even for a retired mechanical engineer and self-described "nut and bolt man," particularly after he resolved that only a fully functioning machine would do. "I learned many years ago that the dafter the project, the easier it is to get good publicity for the cause," he quips.

Using the outline dimensions of a unit in the Thackray Medical Museum in Leeds as a reference, Frank rolled and welded steel for a cylindrical main chamber, fabricated tracks for a mattress that slides into and out of the unit, and cut access doors and windows. "I cajoled various local companies into assisting with the project," he says, particularly painting the unit and a trailer used to transport it; Upper Eden club members also assisted. "I suppose in some ways people are used to my harebrained ideas, and not one of them declined to support the project," he adds. Frank, who bore most of the construction costs, concedes that most of the 650 hours he spent over four months on the heavy metal labor of love were devoted to the trailer, itself a showcase worthy of a Rolls-Royce Phantom.

"To finish the job, he then created visual displays to fit into and onto the trailer, including a television program of iron lungs being used 'for real,'" notes Ben Lyon, the club's immediate past president. "The finished result is a stunning promotional and educational tool in aid of polio eradication." Onsite, a computer-controlled sequence activates the lung, in thumps and whooshes, for five minutes before triggering a YouTube video about iron lungs.

As a static exhibit the lung is lifeless and really comes alive when the motor starts and the end bellow operates. "I think it really helps give people an understanding of how it would be to be locked in it," Frank says. "Also the drive unit, or mechanism, is quite noisy and adds to the atmosphere, just as the original units did."

"Most people, especially young ones, are totally dumbfounded by the whole spectacle, and after watching the video are mesmerized and stand motionless for quite a few seconds," says Frank, "I suppose in awe, or taking in how somebody could spend [nearly] their entire life in such a machine."

Sara Dumbell, a journalist with BBC Radio Cumbria who [reported on the project](#), says: "I get sent on many exciting jobs, but getting to see a real life-size replica iron lung was a first for me. The iron lung itself was hugely impressive. I'm 28, and so the major UK outbreaks of polio were a little before my

time, but it was deeply moving to learn about how so many children across the world were forced to live in these machines.

"I couldn't leave without trying out the iron lung for myself, but having the metal lung separating your head and body at the neck I found to be the most uncomfortable feeling," she adds. "I must admit I was quite relieved when I was allowed out."

With a nod to the red End Polio Now donation buckets at the ready, Frank says, "I kid people that it is £1 to get into the unit and £50 for me to let you out."

Schmelling began his career at Rotary in 1995 and has held several positions, including director of planned and major gifts. "It is truly an honor to work for an organization dedicated to making the world a better place," said Schmelling. "I have invested much of my career here because I believe in Rotary's mission to end polio and provide those in need with access to clean water, education, peace, healthcare and economic opportunities. As CDO, I am excited to help lead the organization's efforts to make sure we have the financial resources to continue improving communities worldwide."

Schmelling is an alumnus of Beloit College in Wisconsin and received his M.A. from Central European University in Hungary. He is a member of the Rotary Club of Evanston Lighthouse.

Today's Thoughts in Honor of

Abraham Lincoln's Birthday – February 12th

Always bear in mind that your own resolution to succeed is more important than any one thing.

- Abraham Lincoln (1809 - 1865)

Valentines Day – February 14th

There is no surprise more magical than the surprise of being loved. It is God's finger on man's shoulder.

- Charles Morgan (1795 – 1878)

A Kansas tornado hit a farmhouse just before dawn one morning. It lifted the roof off, picked up the beds, on which the farmer and his wife slept, and set them down gently in the next county.

Suddenly the wife began to cry. "Don't be scared, Mary," her husband said. "We're not hurt."

Mary continued to cry. "I'm not scared," she responded between sobs. "I'm happy 'cause this is the first time in 14 years we've been out together."
